TEACHING

Arizona State University (2015-present)

FAS 370 – Family Ethnic and Cultural Diversity

Description: This is a 3-credit hour, undergraduate-level, introduction course to family ethnic and cultural diversity. In an in-person, medium-to large-class-size format (i.e., ≤ 80), students learn the main related to diversity, equity, and inclusion, and the ways in which they can be translated into policy and interventions. The class consists of lectures and in-class exercises. We review basic elements to understand the history of racism and oppression in the United States, the foundations of diversity, equity, and inclusion science, such as critical race theory and intersectionality. Students are evaluated based on thought papers, quizzes, and exams.

1. Spring 2022: 74 students
2. Fall 2021: 93 students
3. Fall 2020: 78 students
4. Fall 2019: 35 students
5. Spring 2019: 52 students
6. Fall 2018 1: 37 students
7. Fall 2018 2: 31 students
8. Spring 2018: 31 students
9. Fall 2017: 34 students
10. Spring 2016: 31 students

FAS 598 – Theory and Methods in Diversity and Inclusion Science

Description: This is a 3-credit hour, graduate-level, advanced course on theory and methods on diversity and inclusion science. In an in-person, small-class-size format (i.e., ≤ 20), students learn advanced conceptual and methodological tools related to structural racism and other systems of oppression, including critical race theory and intersectionality. The class consists of discussions of readings that the students selected based on an active learning and student participatory approach to the co-construction of the syllabus. Students are evaluated based on

thought papers for each class, and a final original paper on theory, research, methods, and/or interventions to address these issues.

1. Fall 2021: 7 students

FAS 598 - Introduction to Systematic Reviews and Meta-Analysis

Description: This is a 3-credit hour, graduate-level, introduction course to systematic reviews and meta-analysis (SR&MA). In an in-person, small-class-size format (i.e., ≤ 20), students learn basic conceptual, methodological, logistical, and statistical tools to conduct a SR&MA. The goal of the class is for students to be able to complete and pre-register a protocol following PRISMA guidelines. The class consists of class discussions one day, and hands-on lab exercises focused on specific tasks related to writing the protocol. We review basic elements to understand the history, reasons, possibilities, and limitations of SR&MA. Next, we discuss the importance of the research question, as well as inclusion and exclusion criteria. Students learn search strategies, creating a codebook, data extraction and coding, effect size coding and conversion, model selection, and testing heterogeneity, moderation, and publication bias. Students are evaluated based on thought and lab papers, and submission of a protocol.

1. Fall 2019: 19 students

FAS 598 – Culture and Biology Interplay

Description: This is a 3-credit hour, graduate-level, introduction course to culture and biology interplay. In an in-person, small-class-size format (i.e., ≤ 20), students learn basic theory and research on culture and biology interplay. The class consists of class discussions of landmark and recent readings. The goal of the class is for students to be able to understand the history, concepts, findings, and limitations of this field. We focus on the foundations of theory and research on culture and biology interplay, and focus on specific areas including animal culture, cultural neuroscience, cultural neurobiology, and cultural genomics. Students are evaluated based on thought papers, and submission of a final paper.
